

Award-Winning Personal Watercraft

Composite Applications:	Hull Deck
Manufacturing Process:	Robotic Projection Open Molding
Resin:	Altek® Laminating Polyester
Hull Weight:	130 pounds (59 kilograms)
Deck Weight:	75 pounds (34 kilograms)

Hull/Deck Assembly Dimensions:

Width:	44 inches (112 centimeters)
Length:	107 inches (272 centimeters)

Bombardier Recreational Products created the SeaDoo® 3D to deliver the traditional excitement of freestyle riding in a variety of operating positions. The editors of Boating Magazine were so impressed with the versatile new craft, they selected the SeaDoo 3D as their "Boat of the Year."

The SeaDoo3D watercraft is built to the highest industry standards that have made Bombardier Recreational Products (BRP) a world leader in powered fun. To support BRP's commitment to quality and performance, North American composite resin leader AOC supplies Altek® unsaturated polyester for the SeaDoo 3D hull and deck.

For the automated production of the SeaDoo® 3D's hull and deck, Bombardier Recreational Products appreciates the fast-cure characteristics of Altek® laminating resin.

"The AOC resin has a high level of repeatability, very good mechanical properties and a high heat deflection temperature," says Martin Bigras, Research and Development Engineer for Bombardier Recreational Products.

More than a material system

Bigras explains that Bombardier Recreational Products gets more than a material system by specifying resin supplied from AOC's Guelph, Ontario, facility. "When I have a technical problem related to the resin, I always know that our representative, Marc St-Germain, will find the right person at AOC to help us," he says. "The people at AOC always want to help us in our improvement program. They participate in our development work to understand our needs."

Award-Winning Personal Watercraft, continued

“We are proud of the role we play in helping BRP’s and are honored to supply resin for the Boat of the Year,” says Emilio Oramas, Business Manager - Open Mold, for AOC. “With its superb maneuverability and unique versatility, the SeaDoo 3D has created an entirely new niche for watersport enthusiasts.”

About Bombardier Recreational Products

With headquarters in Valcourt, Quebec, Canada, Bombardier Recreational Products Inc. is the world leader in recreational vehicles and products. The people of Bombardier Recreational Products use innovative technology and creative design to deliver extraordinary recreational experiences. In addition to Sea-Doo® watercraft and sport boats, product lines include Ski-Doo® and Lynx® snowmobiles, Rotax® karts and engines, Bombardier ATVs and Evinrude® and Johnson® outboard engines. For more information on ways to achieve the ultimate ride, locate your local dealer at www.brp.com.

About AOC

AOC is a leading global supplier of resins, gel coats, colorants, additives and synergistic systems for composites and cast polymers. AOC products are manufactured in facilities strategically located in North America, Europe and Asia. The quality management systems of AOC-owned manufacturing plants are certified to ISO 9001:2000 standards and use proprietary control technology to ensure resin batch-to-batch consistency. For more information, e-mail smartin@aac-resins.com, phone (901) 854-2800 or visit www.aac-resins.com on the Internet.
