

**AOC**<sup>®</sup>  
World Leader in Resin Technology

  
**Hydropel**<sup>®</sup>  
HIGH PERFORMANCE  
MARINE RESINS

CHART  
YOUR COURSE TO  
SUCCESS

**The next wave in boatbuilding technology is here with the superior strength, performance and aesthetics of marine resins and gel coats from AOC, a proud member of Chaparral Boats' Supplier Team.**

## OPTIMIZING THE SYSTEM

---

AOC's broad range of marine technologies include time-proven leaders in resin cost-performance. Innovative new technologies help manufacturers comply with new Environmental Protection Agency emission standards and still get the processing, performance and value that launched the era of AOC marine resin predominance.

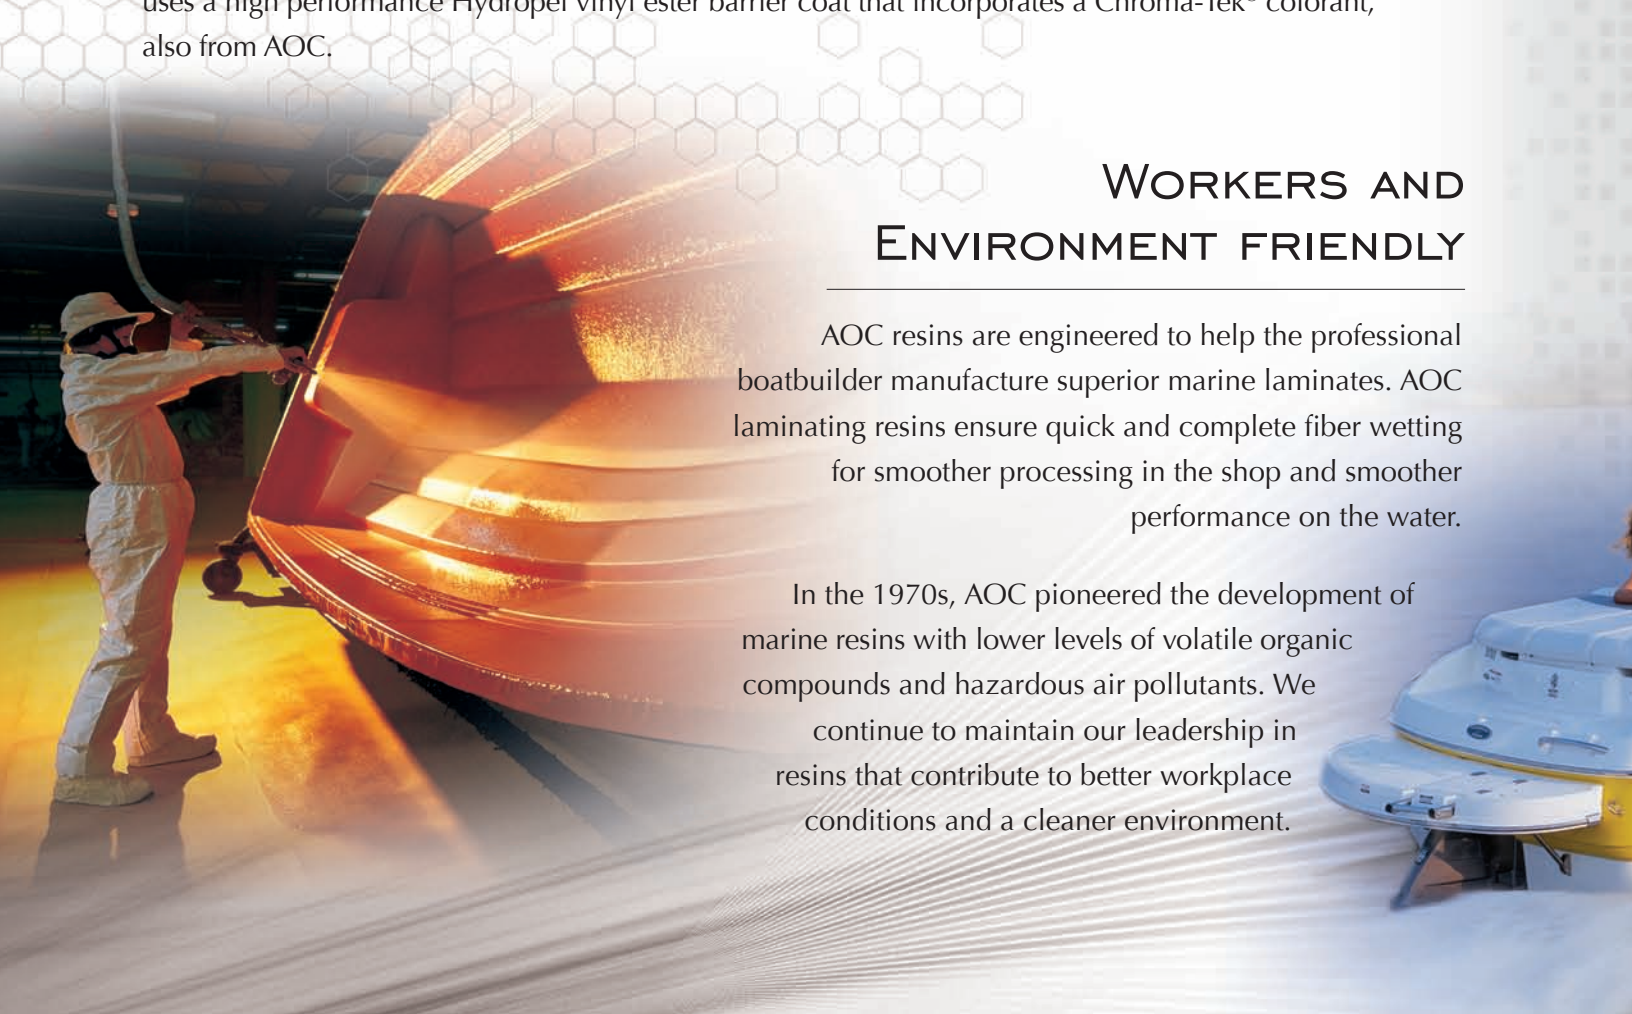

AOC marine resin offerings include a complete line of premium Hydropel® High Performance Resins based on vinyl ester chemistries. When used as a skin coat behind the gel coat, the Hydropel resin forms a powerful barrier against the permeation of blister-causing moisture. For larger boats, Chaparral uses a high performance Hydropel vinyl ester barrier coat that incorporates a Chroma-Tek® colorant, also from AOC.

## WORKERS AND ENVIRONMENT FRIENDLY

---

AOC resins are engineered to help the professional boatbuilder manufacture superior marine laminates. AOC laminating resins ensure quick and complete fiber wetting for smoother processing in the shop and smoother performance on the water.

In the 1970s, AOC pioneered the development of marine resins with lower levels of volatile organic compounds and hazardous air pollutants. We continue to maintain our leadership in resins that contribute to better workplace conditions and a cleaner environment.

## A HERITAGE OF CUSTOMER FOCUS

The marine industry was the core business of AOC founding company Alpha Resins when it was launched in 1961. Over the years, AOC resin technologies evolved with new and improved resins that helped customers leave their competition behind.

This tradition in marine resin excellence strengthened when Alpha joined the synergistic creation of AOC, a privately owned enterprise where long-term customer satisfaction prevails over short-term gains. No wonder more boats in North America have been made with AOC resins than any other kind.

**Hydropel**

**PROVEN  
AROUND  
THE WORLD**

Built with the strength and reliability of an advanced Hydropel® resin from AOC, the “Cable & Wireless Adventure” superboat beat the world record for circumnavigating the globe by more than eight days!

## FULL-SERVICE SUPPLIER

Every Hydropel® marine resin is manufactured to world-class quality control standards in AOC manufacturing plants that are certified as meeting ISO 9001:2008 requirements. AOC's proprietary process control provides the industry's highest levels of resin consistency, time after time. Our professional technical support team is on-call to help marine manufacturers get the most out of AOC technology. Manufacturers can also count on our solid distribution partners, because only the best, most knowledgeable distributors carry AOC resins.

**Vibrin**<sup>®</sup>  
GEL COATS

## THE AOC SUPER SYSTEM

AOC offers a complete boatbuilding system with Vibrin® gel coats for the marine industry. Vibrin gel coats meet specific requirements for rich color, high gloss, impact protection and long term durability. Like their high performance resin counterparts, Vibrin gel coats deliver the added values of superior consistency and technical support dedicated to helping the customer succeed.

To build, sell or own a pleasure boat of distinction, chart your course to success with the advanced technology and world-class quality of marine resins and gel coats from AOC, world leader in resin technology.

# THE WORLD OF

# AOC<sup>®</sup>

*World Leader in Resin Technology*

AOC is a leading global supplier of resins, gel coats, colorants, additives and synergistic material systems for composites and cast polymers. AOC knows technology, lives quality, and delivers service better than any other resin supplier. For more information, go to
