Vipel F085 series are epoxy novolac vinyl ester resins dissolved in styrene.

**Applications**
The Vipel F085 series is ideally suited for applications where outstanding mechanical properties and resistance to chemicals, oxidation and heat are required.

**Benefits**

**Corrosion Resistance**
Vipel F085 offers excellent resistance to acidic and mild alkaline environments (pH 1-12). Performs well in a wide range of acidic oxidants and solvents. Vipel F085 is generally resistant to liquids and vapors at higher temperatures than standard bisphenol-A epoxy vinyl ester resins.

**Versatile**
Suitable for various fabricating methods such as hand lay-up, spray-up, filament winding, etc.
