AOC’s Vipel F282 series are high molecular weight, bisphenol-A fumarate, unsaturated polyester resins.

**Applications**
Ideal for filament winding and spray-up applications.

**Benefits**

**Corrosion Resistance**
AOC’s Vipel F282 is designed to make parts for a broad range of chemical environments such as acidic, bleach, hydrogen peroxide, oxidizing media and caustic.

**Versatile**
Suitable for various fabricating methods such as hand lay-up, spray-up, filament winding, etc.

AOC is a major global supplier of resins, gel coats, colorants & materials for composites and cast polymers.
