GEL COATS

VIBRIN® G112

Polyester Gel Coat for Sanding Applications

Vibrin® G112 is a fully promoted, thixotropic, orthophthalic polyester gel coat for spray applications. Primer paint colors are suggested.

APPLICATIONS

- Conventional Sanding

BENEFITS

- Excellent sandability and processability make the product ideal for the production of parts that are later painted, such as in the transportation and recreational vehicle markets.
- Fast cure, which enables fast part cycle times.
- Resistant to porosity, which allows easy painting with no surface defects.
- Good elongation with a resistance to cracking during part demold and installation.
