GEL COATS

VIBRIN[®] G130

Polyester Gel Coat for Sanding Applications

Vibrin G130 is a fully promoted, thixotropic, polyester gel coat for spray applications. Primer paint colors are suggested.

APPLICATIONS

- Conventional Sanding

BENEFITS

- Excellent sandability and processability make the product ideal for the production of parts that are later painted such as in the transportation and recreational vehicle markets.
- Good elongation.
- Fast cure which enables fast part cycle times.
- Resistant to porosity, which allows easy painting with no surface defects.
- Low HAP levels enable the product to meet MACT standards.
- Less overspray allowing improved transfer efficiency.
- Lower styrene emissions reduce occupational exposures.
