MARINE  
GEL COATS

# HYDROPEL<sup>®</sup> H010-B

## Vinyl Ester Barrier Coat for Spray Applications

Hydropel<sup>®</sup> H010-B is a fully promoted, thixotropic, vinyl ester barrier coat for spray applications behind gel coat.

### APPLICATIONS

Hydropel<sup>®</sup> H010-B is designed to be applied in back of the exterior gel coat to provide a barrier to water.

### BENEFITS

- Maximum blister resistance
- Improves resistance to glass print
- Does not require cure of the gel coat prior to application

**AOC is a major global supplier of  
resins, gel coats, colorants & materials  
for composites and cast polymers**
