ALTEK® H490
General Purpose Resilient Laminating Resin

H490 Series is a medium reactive, thixotropic, prepromoted, toughened polyester resin.

APPLICATIONS
H490 Series is designed for use in the construction of various composite parts using hand lay-up spray up methods.

BENEFITS

Superior mechanical properties
When used with the proper glass reinforcement content, AOC’s Altek H490 Series produces a composite with superior mechanical properties that can assist in the reduction of cracking.

Superior processing
When used with the proper glass reinforcement content, AOC’s Altek H427 Series resin produces a composite with superior toughness properties that can assist in the reduction of composite cracking.

AOC is a major global supplier of resins, gel coats, colorants & materials for composites and cast polymers
