ALTEK® H559
Orthophthalic Resin for Hand Lay-up and Spray-up Applications

AOC’s H559 is a pre-promoted, thixotropic polyester resin formulation made from a base resin specifically designed for general purpose laminating applications.

APPLICATIONS
H559 is designed for use in the manufacturing of various composite parts in hand lay-up/spray-up applications.

BENEFITS
• Good “wet-out” of all types of glass
• Medium viscosity
• Moderate exotherm
• Improved elongation properties
