AOC’s Vipel K022 series are brominated bisphenol-A epoxy vinyl ester resins dissolved in styrene.

**Applications**
Vipel K022 series is ideally suited for use in hand lay-up, spray-up, filament winding and pultrusion processes where outstanding mechanical properties and excellent resistance to chemicals and heat are required.

**Benefits**
**Versatile**
Vipel K022 is available in a wide range of formulations, which allows the product to be used in many processes and also optimizes cost/performance.

**Fire Retardant**
Because of the versatility of Vipel K022, versions are available to meet ASTM E 84 Class 1 or 2 flame spread.

**Corrosion Resistance**
Vipel K022 is highly resistant to both acidic and alkaline environments.

AOC is a major global supplier of resins, gel coats, colorants & materials for composites and cast polymers.
