AOC's N114 Shrink Control Additive is a rubber-modified polystyrene based additive that has been thinned in styrene. N114 is intended to reduce shrink in high reactive polyester resins designed for Sheet Molding Compound (SMC) and Bulk Molding Compound (BMC) applications.

APPLICATIONS
• Electrical Housings and Applications
• Consumer Goods
• Construction Applications
• Automotive Applications

BENEFITS
• Low Shrink Additive
• Suitable in pigmentable applications
• Less shrink than standard poly styrene systems
