Pultru P341-550 is a one-pack polyester resin containing a proprietary shrinkage control system. It has been specially formulated to maximize adhesion to acrylic cap stock coatings.

APPLICATIONS
Especially suited to thin complex profiles typically used in fenestration and door applications. The superior surface finish makes Pultru P341-550 an excellent choice for both painted or acrylic cap stock coated profiles.

BENEFITS
• High reactivity for fast line speeds in thin complex profiles.
• Improved surface finish.
• Excellent adhesion to acrylic cap stock coatings.
• Excellent adhesion to paint.
• Formulated to accept higher filler loadings.
