HYDROPEL® R049
Hydropel Low Profile Modified Vinyl Ester Resin

Hydropel R049 Series is a promoted, unique, low profile modified vinyl ester system.

APPLICATIONS
Hydropel R049 series is designed for use in RTM and liquid molding processes.

BENEFITS
Surface Quality
R049 Series has excellent strength and toughness in finished parts.

Superior Mechanical Properties
The low viscosity allows faster fill times or higher filler loading depending on the process.

Low Neat Viscosity
Higher filler loading can be used to achieve better surfaces and higher physical properties.

Lower Exotherms
Lower exotherms than typical LPA systems. This can result in longer tool life.

AOC is a major global supplier of resins, gel coats, colorants & materials for composites and cast polymers
