ALTEK® R596
Toughened, Orthophthalic Polyester Resin

AOC’s Altek R596 is a prepromoted air-dry polyester resin system, designed to be used in RTM. It is a higher reactive orthophthalic unsaturated polyester with superior physical properties.

APPLICATIONS
AOC’s Altek R596 is used in RTM and RTML processes. Uses range from RV parts to fan shrouds and other special need applications.

BENEFITS
• Low viscosity
• Rapid wet-out
• Superior physical properties

AOC is a major global supplier of resins, gel coats, colorants & materials for composites and cast polymers
