AOC’s Altek R701 is a promoted, non-thixotropic, isophthalic-type, unsaturated polyester resin designed for RTM and vacuum molding processes such as infusion, SCRIMP, LRTM and CCBM applications.

APPLICATIONS
The Altek R701 has been developed for use in mild corrosion applications such as the marine and industrial markets.

BENEFITS
- Good mechanical strength, toughness, HDT and elongation.
- Fast hardness development for quick de-mold times.

Food and Drug
All resins listed on this series are manufactured from raw materials that are listed in FDA regulation Title 21 CFR 177.2420.
