AOC’s Altek R937 is a pre-promoted, non-thixed, low shrink polyester resin system.

**APPLICATIONS**
The Altek 937 is specifically designed for RTM, RTM Light or vacuum infusion.

**BENEFITS**
- Low viscosity for fast fill times or higher filler levels.
- Low shrinkage for improved surface cosmetics.
- Fast hardness development for quick de-mold times.
- Low peak exotherm.
- Meets MACT requirements for low HAP resins in the marine industry.

**Complies with California AQMD Rule 1162**
